

Euro

The Euro has been designed as a light weight yacht tender which can easily be lifted onto the foredeck of your motor yacht. A stylish light weight console incorporates full upholstery seating, internal storage and an inline fuel tank which is both functional and will complement the look of your yacht. The boat is a true performer and it's versatility allows the boat to be used as a family fun boat. The Euro is designed specifically for electric start outboards. Available in Polymar or Hypalon fabric.

Standard features of the EURO1101 & 1198:

- » Epoxy coated hulls
- » Raised anchor locker seat with access hatch and mooring cleat
- » Davit lift points
- » Under seat storage
- » Paddles
- » Internal seating and upholstery
- » Folding back rest
